Chiropractor

Chiropractor in Brampton

Chiropractic care is a regulated health care profession that focuses on spinal, muscular, and joint pain or injuries. Every muscle, organ and tissue in your body is impacted by your nervous system. If there is interference to the normal function of your nervous system, then your spine, musculoskeletal system and the rest of your body is negatively impacted and you will likely feel pain or discomfort. Chiropractic care is one of the ways to relieve this pain and discomfort, and to optimize the function of your nervous system and the rest of your body.

Chiropractors examine the biomechanics, structure and function of the spine and other joints, and preforms the manipulation technique to increase the efficiency of the spine and other joints, relives pain, stiffness and discomfort of the joints

Our trained, certified and highly experienced chiropractors provide effective and comprehensive treatments to patients. When you visit a chiropractor at Finchgate Physiotherapy, you also gain the invaluable knowledge of our Medical Doctors, Physiotherapists, Naturopathic Doctors and Massage Therapists. We work as a team to bring you the best care possible.

Since the chiropractic methodology takes a whole-body approach to healthcare, it is highly effective when combined with other forms of treatment. By relieving the musculoskeletal aspects of your condition, you benefit from improved body alignment, pain relief and a renewed sense of wellbeing.
